Nginx
pnpm workspaces

Languages

English: (B2)
Polish: (Native)

EXPEIRENCE

Fullstack developer (part time) at KoksCraft

November 2023 - December 2024

Developed and maintained the admin panel for the largest Minecraft server in Poland. Implemented role- and permission-based authentication and authorization, as well as real-time user status tracking (online/offline) using WebSocket. The application is actively used by 10+ team members daily and has significantly improved team efficiency and operational workflow. Tech stack: React, TypeScript, Node.js, Fastify, Prisma, MySQL, WebSocket.

PROJECTS

CoinControl

React TypeScript TanStack (Router, Query, Table) Zod
Tailwind CSS BullMQ Docker Vitest Express Prisma

Live: <https://coincontrol.maciej-garncarski.pl/>

Repo: <https://github.com/MaciejGarncarski/coin-control>

CoinControl is a personal finance application designed to help users track their income and expenses. It tackles the widespread issue of poor financial oversight by offering intuitive tools for budgeting, expense categorization, and financial planning, empowering users to make informed decisions and manage their money more effectively.

Photo App

Next.js (React) TypeScript TanStack Query CSS Modules

Live: <https://photoapp.maciej-garncarski.pl>

Repo: <https://github.com/MaciejGarncarski/photo-app>

PhotoApp is social media application created in the modern tech stack. In this app, you can create posts, comment them and chat with other users. It was my first attempt to create such a complicated app. It was tough experience, but in the end I learned a lot of things.

OPEN-SOURCE INVOLVEMENT

TanStack Router

PR: <https://github.com/TanStack/router/pull/2247>

Repo: <https://github.com/TanStack/router>

Fixed bug, where pendingComponent was not rendering if preload="intent" was set.
